1988 OHIO COUNTY PROFILES

The 1988 Ohio County Profiles are designed to offer a statistical compendium of selected demographic and economic characteristics accompanied with business and industry activity and amenities/services for Ohio and its 88 counties. The purpose of this publication is to provide business development prospects, researchers, planners, government leaders, and the general public with a brief and current statistical overview of Ohio counties to use as an aid in business decisions or policy making. Further detail and additional information is generally available from the source document. A listing of sources is included on the following pages of this publication.

The information contained in Ohio County Profiles was collected from a variety of governmental sources. Every effort has been made to insure that the most recent data available has been used. The process of collecting, processing, and organizing the data has been automated considerably, which results in a more timely publication of this document.

Any comments or suggestions to improve the usefulness of the profiles would be appreciated and may be addressed to the office below.

OHIO DATA USERS CENTER

The Ohio Data Users Center (ODUC), located within the Ohio Department of Development is the main research office for the Department, and is also designated as the State Data Center Affiliate of the U.S. Bureau of the Census, U.S. Department of Commerce. ODUC is an information Center which is geared to assist and provide clients in both the public and private sectors access to published and computerized census data relating to the demographic and/or economic characteristics of the state and its subdivisions. Through its state data center function, ODUC utilizes census data and other resources to develop products and reports to assist clients in understanding the demographic and economic characteristics of the State in statistical form, such as the Ohio County Profiles.

EXPLANATORY NOTES TO 1988 OHIO COUNTY PROFILES

[1] 1980 total population figures may differ slightly due to revisions in the published 100% counts.

[2] The Bureau of the Census defines Industrial Buildings as plants producing, processing, and assembling goods and materials, together with affiliated buildings such as warehouses, garages, administration buildings, etc.

N/A = Not Reported

[3] The Bureau of the Census defines Commercial Buildings as office, bank, and professional buildings, service stations and repair garages, stores and other mercantile buildings, and amusement and recreational buildings.

N/A = Not Reported

[4] In some industry sectors actual employment may be suppressed. Employment ranges are entered that reflect actual employment in the particular sector.

N/A = Percent Change cannot be calculated due to presence of employment ranges.

[5] N/A = Data is not available because industry has fewer than three employers.

[6] Class I Airports are large airports served by major airlines flying national and international routes.

[7] Class II Airports are reliever airports, which can handle excess traffic from Class I airports. They also serve as principal airports for smaller cities and counties.

[8] Serious Crimes include the FBI classifications for murder, rape, robbery, aggravated assault, burglary, theft, auto theft and arson. The rates reflect only those crimes reported to law enforcement authorities, and only those agencies reporting in at least 6 months of data for 1985.
